Patient Name: TANMAY DAS

Lab No: BK/26-27/01016

Age / Sex: 31 Yrs / Male

Date: 24-Sep-2026

Ref. Doctor: SELF

Contact: 9804349062

DEPARTMENT OF RADIOLOGY & IMAGING U S G REPORT OF WHOLE ABDOMEN (MALE)

LIVER :

Liver span = 1.00 cm.(approx); AP diameter = 1.00 cm.(approx). Liver is normal in shape. Echotexture appears normal. No focal lesion is detected. Intra hepatic biliary channels are not dilated. Hepatic veins are normal. Left lobe and caudate lobe appears normal in size.

GALL BLADDER :

It is distended and globular in shape. Wall is normal in thickness. Lumen appears free. No intraluminal calculus/SOL noted. Gall bladder neck appears normal. No pericholecystic collection seen.

PORTAL VEIN :

It is normal in size. It measures : 1.00 cm.(approx).

COMMON BILE DUCT (CBD) :

It is normal in caliber. No calculus / SOL noted within it. CBD measures : 1.00 cm.(approx).

PANCREAS :

Pancreas is of normal shape and size. Echotexture appears normal. Main pancreatic duct is not dilated. No Peripancreatic duct calculi / parenchymal calcification seen. Peripancreatic tissue is unremarkable.

SPLEEN :

Spleen is of normal shape and size. Echotexture appears normal. No focal lesion is seen. Spleen measures : 1.00 cm.(approx).

RIGHT KIDNEY :

Right kidney is normal in shape, size and location. Cortical echotexture is normal with preserved cortico medullary echo differentiation. No calculus / cyst / solid mass / hydronephrosis is noted. Right Kidney measures : 1.00 x 1.00 cm.(approx).

LEFT KIDNEY :

Left kidney is normal in shape, size and location. Cortical echotexture is normal with preserved cortico medullary echo differentiation. No calculus / cyst / solid mass / hydronephrosis is noted. Left Kidney measures : 1.00 x 1.00 cm.(approx).

URETERS :

Both ureters are not dilated hence not visualised.

URINARY BLADDER :

It is optimally distended. Wall is normal in thickness. No focal lesion is detected.

POST VOID :

Post void residual volume of urine is insignificant and measures : cc. (approx).

PROSTATE :

Prostate is normal in size, shape. Parenchymal echotexture is heterogeneous.

Capsular outline is intact.

Prostate measures : 1.00 x 1.00 x 1.00 cm.(approx) and volume : 00 cc.(approx).

ILIAC FOSSA SCAN :

Both iliac fossa are normal. No collection / SOL seen. Both psoas muscles are normal.

RETROPERITONEUM :

Aorta and IVC appears normal. No retroperitoneal lymphadenopathy seen.

No free fluid noted within abdominal cavity.

UTERUS :

Uterus is normal in shape, size and position. Endometrial echo is normal in thickness (cm.). Myometrial echopattern is normal. Cervix and vagina appears normal.

Uterus measures : 00 x 00 x 00 cm. (approx).

OVARIES :

Both the ovaries are bulky in size with increased stromal thickness and echo seen.

Multiple anechoic cystic area scattered in bilateral ovaries > 7 in number in each <1 cm. in diameter.

Both ovaries are normal in shape, size and echotexture.No obvious mass lesion seen.

Right Ovary measures : 00 x 00 cm.(approx) and

Left Ovary measures : 00 x 00 cm.(approx).

ILIAC FOSSA SCAN :

Both iliac fossa are normal. No collection / SOL seen.Both psoas muscles are normal.

POUCH OF DOUGLAS :

No obvious collection / SOL seen.

IMPRESSION :

USG WHOLE ABDOMEN SHOWS NO OBVIOUS ABNORMALITY.

Suggested :- Other relevant investigation, follow up & clinical correlation.

Checked by

DR. S. BHATTACHARYA
MD [RADIOLOGY]
CONSULTANT RADIOLOGIST & SONOLOGIST

DEPARTMENT OF RADIOLOGY & IMAGING
U.S.G OF KUB (MALE)

ULTRASONOGRAPHY OF TRANSPLANT KIDNEY

Transplant kidney shows normal size and shape. Kidney is located in right Iliac fossa. Transplant kidney measures 96 x 61 x 56 mm. (approx). No obvious perirenal collection noted. Renal parenchymal thickness preserved. Cortico-medullary echo differentiation is preserved. Central echocomplex unremarkable. No hydronephrosis-hydroureter seen. No cyst or solid SOL seen.
No sizeable calculus seen.

On Doppler study, renal vascular pedicle shows normal arterial and venous flow. Vascular anastomosis is well visualised, showing normal flow spectrum. Both main renal artery and vein shows normal flow and spectrum.

Intrarenal vessels show even distribution although renal parenchyma. Intrarenal vessels show normal flow spectrum with normal Doppler parameters. No apparent area of loss of vascularity seen.

URINARY BLADDER :

Well distended. No calculus or mass lesion within.

PROSTATE :

Normal in size & shape. Parenchyma heterogeneous prostate measures 44 mm. x 38 mm. x 36 mm. (approx) & volume 31 cc.

IMPRESSION :

TRANSPLANT KIDNEY (IN RIGHT ILIAC FOSSA) SHOW NO OBVIOUS ABNORMALITY (at present).

DEPARTMENT OF RADIOLOGY & IMAGING
ULTRASONOGRAPHY OF WHOLE ABDOMEN -MALE

LIVER: SPAN:-

Liver measures: cm ; AP diameter:- cm.(approx). Hepatic margins smooth. Shape preserved. Parenchymal echopattern is normal. There is no sizeable focal parenchymal abnormality. Intra hepatic vascular and biliary radicles are not dilated. Left lobe and caudate lobe appears normal in size.

GALL BLADDER:-

Gall bladder well distended - elliptical. The walls are regular and normal in thickness.

Lumen is clear. No sizeable calculus is seen in the lumen.

CBD:-

CBD is normal in calibre measures : cm. and shows clear lumen.

No obvious calculus or SOL noted within. No filling defect seen.

PORTAL VEIN:-

Portal vein measures approx. cm. (normal).

PANCREAS: -

Pancreas is normal in shape & size. Outline is regular. Echopattern is normal. No SOL is seen.

Pancreatic duct is not dilated. No abnormality is seen in peripancreatic region.

SPLEEN:-

Spleen is normal in size, outline and echotexture. No focal abnormality is seen in the parenchyma. The splenic vein and its tributaries appear normal.

Spleen measures: cm. (approx).

KIDNEYS & URETERS:-

Both kidneys are normal in size, shape, outline and position. Renal cortical echotexture is normal with preserved cortico-medullary echo differentiation. There is no evidence of any solid or cystic lesion, no renal calculi or hydronephrotic changes seen. Perirenal spaces are clear. Not dilated hence not visualized.

Right Kidney measures: x cm. (approx).

Left Kidney measures: x cm. (approx).

RIGHT KIDNEY & URETERS :

Right kidney is normal in size, shape, outline and position. Renal cortical echotexture is normal with preserved cortico-medullary echo differentiation. There is no evidence of any solid or cystic lesion, no renal calculi or hydronephrotic changes seen. Perirenal spaces are clear. Not dilated hence not visualized. Right Kidney measures : x cm.(approx).

LEFT KIDNEY & URETERS :

Left kidney is normal in size, shape, outline and position. Renal cortical echotexture is normal with preserved cortico-medullary echo differentiation. There is no evidence of any solid or cystic lesion, no renal calculi or hydronephrotic changes seen. Perirenal spaces are clear. Not dilated hence not visualized. Left Kidney measures : x cm.(approx).

URINARY BLADDER:-

Prevoid: Shows normal distension. Bladder walls are regular. No Calculus / Growth / Sludge etc are seen in the walls or lumen. Prevoid urinary bladder volume is ml (approx.)

POSTVOID:-

Post void residual urinary bladder volume is increased / insignificant ml (approx).

UTERUS:-

Anteverted. Normal in shape and outline. The size is within normal limits measures: x x cm. Myometrium:- Normal homogenous appearance.

No myomatous lesion is seen. Endometrium:- Normal in thickness cm.

and brightness. The cavity is empty. Cervix and vagina appears normal.

ADNEXA: -

The fallopian tubes are not dilated. Both ovaries are normal in size and echopattern.

No ovarian or adnexal SOL seen. Capsular outline is preserved.

Right ovary measures: x cm. (approx).

Left ovary measures: x cm (approx).

POUCH OF DOUGLAS:-

Clear.

PROSTATE:-

Prostate is normal in size, outline and echotexture appears normal. No focal lesion is seen.

Prostate measures: x x cm. approx. weight: grams.

MISCELLANEOUS: -

No free fluid is seen in peritoneal cavity / either pleural space. No retroperitoneal abnormality is seen. Aorta and IVC appears normal. No enlarged para-aortic lymphnodes seen.

ILIAC FOSSAE: -

No definite abnormality seen. Bilateral psoas shadows are normal.

No obvious collection / SOL seen.

IMPRESSION:

No Significant Abnormality is seen in USG scanning of Whole Abdomen.
